DETAILED ACTION

1. The amendment of 6/2/06 has been received and entered.
2. Claims 1-16, 18, 20, 22-24, 26, 28, 30, 31 and 46-51 are pending.
3. Claims 1-16, 18, 20, 30, 31, 46-51 are allowable as previously indicated.
4. Repeated attempts to reach Crystal Sales at (202) 986-3179 have been unsuccessful. A message regarding claims 22-24, 26, 28 was left by the Examiner during the week of June 26th, 2006 suggesting corrective measures, but was not responded to. In accordance with USPTO policy regarding the pendency of case, this action has been sent out.

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 22-24, 26, 28 are directed to non-statutory subject matter because they merely recite a computer program without any corresponding system or structure. A computer program without its respective hardware to execute it is inoperative and therefore fails to provide a concrete, useful and tangible result, as required by MPEP 2106

Apart from the utility requirement of 35 U.S.C. 101, usefulness under the patent eligibility standard requires significant functionality to be present to satisfy the useful result aspect of the practical application requirement. See *Arrhythmia*, 958 F.2d at 1057, 22 USPQ2d at 1036. Merely claiming nonfunctional descriptive material stored in a computer-readable medium does not make the invention eligible for patenting. For example, a claim directed to a

Art Unit: 2134

word processing file stored on a disk may satisfy the utility requirement of 35 U.S.C. 101 since the information stored may have some "real world" value. However, the mere fact that the claim may satisfy the utility requirement of 35 U.S.C. 101 does not mean that a useful result is achieved under the practical application requirement. The claimed invention as a whole must produce a "useful, concrete and tangible" result to have a practical application.
